0 Introduction

- **Exercise 0.12:** The category \mathcal{M} should be the *arrow category*. In particular, the morphisms should be the commutative squares, not merely the pairs (h, k) .
- **Page 10, fourth-to-last line above Exercise 0.14:** In the equation for $g(f(x))$, replace both occurrences of $g(a)b$ with $bg'(a)$.
